Which dimensions does XGBoost split on?

All layers: mean over 240 fitted models (48 layers × 5 folds)

Mean split count

Final layer 47: mean over five fitted models

Mean split count

Split frequency by layer (each row normalized to 100%)

Layer

Input feature index (0–127: Z_{ij} channels 0–127; 128–255: Z_{ji} channels 0–127)

Splits on feature (% of layer total)
