XGBoost gain by input dimension

All layers: mean over 240 fitted models (48 layers × 5 folds)

Mean gain

Final layer 47: mean over five fitted models

Mean gain

Feature gain by layer (each row normalized to 100%)

Layer

Normalized gain (%)

Input feature index (0–127: Z_{ij} channels 0–127; 128–255: Z_{ji} channels 0–127)
