
Decodability versus exact triangle-inequality metrics
Any triangle violation
Mean violation fraction
Mean violation across all triangles
Mean violation (Å)
Mean magnitude conditional on violation
Conditional mean magnitude (Å)
Maximum triangle violation
Mean per-protein maximum (Å)
Violation magnitude 0–5 Å
Mean fraction of all triangles
Violation magnitude 5–10 Å
Violation magnitude 10+ Å
Mean per-protein R^2
Evoformer layer
Shared linear
Per-protein linear
XGBoost
Sequence gated
AA gated
R^2 rises, plotted error rises
