
Decodability versus exact triangle-inequality metrics
Any triangle violation
Mean violation across all triangles
Mean magnitude conditional on violation
Maximum triangle violation
Violation magnitude 0–5 Å
Violation magnitude 5–10 Å
Violation magnitude 10+ Å
Mean violation fraction
Mean violation (Å)
Conditional mean magnitude (Å)
Mean per-protein maximum (Å)
Mean fraction of all triangles
Mean per-protein R^2
Evoformer layer
Shared linear
Per-protein linear
XGBoost
Sequence gated
AA gated
